Abstracts 8301 - 12784

Included are author and subject indexes to Volumes 11 through 15 of Sport Fishery Abstracts.

This Index is a compilation of the previous 5-year Indexes with minor changes. Fifty principal headings are used in the subject index form. American Fisheries Society Special Publication No. 2, "A List of Common and Scientific Names of Fishes from the United States and Canada", is used when possible. The names of fishes not included in that publication are those used in the paper abstracted.
